AFAQY

Technical Management — Western Region

Technical Team Portal — Jeddah

One place for the team's engineering tools and every engineer's performance indicators, built from their real work in MyAFAQY — it opens in the browser like any website, with nothing to install.

Your tools in one place

Engineering tools, company systems and project tools — one link instead of twenty.

Numbers from your work

Tasks done, points and average duration come from your real tasks in MyAFAQY, not from estimates.

Your data stays with you

No server, no uploads. Everything stays in your browser, with a one-click backup.

How it works — four steps

MyAFAQY
Your tasks as they are in the system

→

One-click bookmark
A browser button reads your tasks with your account

→

The portal
Computes points and indicators on your device

→

Decisions and growth
Your KPIs, the "Today" card and your team's weekly goal

Your link — scan and open

Team link

For every engineer and team leader: the tools, company systems and their own KPIs — a team leader also sees their team.

Open it on your phone or computer, and bookmark it.

Engineers and team leaders

No one sees the indicators of a colleague outside their responsibility.

What is in the portal

Six pages — each has a "?" that explains it in place

Team engineering tools

Sensor displacement tool, API helper, canval, Afaqy readers field survey, and calibration certificates

More tools

Tender Analyzer with download and manual, and AFAQY Hunt for prospecting

Company systems

Links to AFAQY systems, projects and Nusuk, Rafed, vendors and support in one list

My KPIs

The "Today" card and six indicators from your real work — each opens its details

AFAQY PRO

Repair quality check: is the device reporting again after service

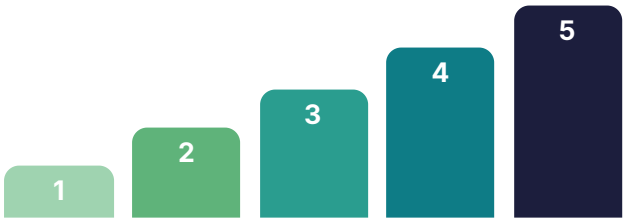

Guide

Every page explained, and a "?" beside each section that explains it in place

Your six indicators in "My KPIs" — each opens its details

- Done
- Points
- Completion rate
- Average duration
- Open now
- From email

How points are counted

Each task type carries a weight from 1 to 5 by difficulty, built from four factors:

- Technical depth
- Work outside the office
- Field work
- Impact

A completed task counts at its weight — so a hard task is worth more than an easy one.

Your first five minutes

1. Scan the "Team link" code and pick your language at the bottom of the menu.
2. From "My KPIs", drag the bookmark button to your bookmarks bar, then open MyAFAQY and click it.
3. Your KPIs and the "Today" card appear — and any tool is one click away on Home.
